HISTORICAL NOTES.

1839. By a resolution of the Mayor and City Council of the 7th of March, 1838, the Commissioners of Public Schools were requested to establish a High School "in which the higher branches of English and classical literature only should be taught." This resolution was promptly carried into effect. The school was organized about the 20th of October of that year (Nathan C. Brooks, A.M., Principal), and was at first known simply as the High School.

In 1848 the Eastern and Western High Schools having in the meantime been established, this school was denominated the Central High School of Baltimore.

In 1851 (Francis Waters, D.D., Principal), "it was determined to reorganize the school upon a new plan upon its opening in September. This reorganization consists principally in dividing the course of study into distinct departments, and adopting a new order of exercises, and new regulations with reference to discipline. Each instructor is allotted to a particular department, and all students in the school receive instruction from him in the studies of that department."—(School Report, 1851, p. 17.) The first Public Day for conferring the honors of the school was observed November 27, 1851.

In the autumn of 1858 (Thomas D. Baird, Principal), under authority of an ordinance of the Mayor and City Council, the Board of Commissioners of Public Schools arranged with the Trustees of the Peabody Institute for the annual distribution of the prizes under the Peabody foundation, and the prizes were accordingly awarded July 22, 1858.

By an ordinance of the Mayor and City Council, approved October 5, 1866, the name of the school was changed to THE BALTIMORE CITY COLLEGE.

In 1877 the course of study was extended from four to five years.

In the spring of 1900 the Board of School Commissioners passed an order that students entering the City College in September, 1900, and thereafter, should receive certificates of graduation upon the satisfactory completion of an approved curriculum.

PROGRAM OF STUDIES
FOR
BALTIMORE CITY COLLEGE.

The program of studies for the Baltimore City College is constructed to accomplish the following purposes:

1. To furnish pupils whose school life will end with the secondary school a sound fundamental education.
2. To give those who mean to devote themselves to teaching in the elementary schools the proper general training preparatory to the special course in the Teachers' Training School.
3. To afford those who seek it special preparation for entering college.

To attain these ends carefully planned courses of study are offered in English literature and composition; in other languages and literatures; in mathematics; in science; in history; in commercial branches; in drawing, and in physical culture. According as the pupil follows one or another of the three lines of instruction named above, his curriculum will be formed agreeably to the rules hereinafter provided.

Furthermore, this program of studies permits differences in the capacity and health of pupils to be considered. Those of good health and unusual ability will be enabled to complete a curriculum in less time than those whose health and capacity require them to proceed more slowly.

Description of the Courses in Each Department.

In English four full years' instruction is provided, including grammar, composition and literature, and the first three years' work is required of every pupil. These courses are constructed with three ends in view:

(a) To train every pupil to write the English language clearly, easily and correctly, and to speak with ease. This object is secured by the use of text-books, dictation, theme writing, reading aloud, declamation and debate, and oral discussion.

(b) To arouse in the pupil an appreciation of good literature, and to acquaint him with the outlines of its history. This end is to be reached by studying in the class and privately a considerable number of writings from the best authors, English and American.

(c) To stimulate a desire to read worthy fiction and general literature. Each pupil reads at least six books a year, selected from carefully compiled lists of supplementary reading.

In the foreign languages provision is made for four years of Latin, three years of German, three years of Greek, three years of French, and two years of Spanish. Of these languages every pupil must take at least one, and pursue it not less than two years.

In mathematics four years' instruction is provided. The sequence of subjects is algebra, plane geometry, solid geometry, trigonometry, advanced algebra, analytic geometry. Of these four courses the first two years' work is required of all pupils. In the second year, however, commercial arithmetic may be substituted for geometry.

In science provision is made for four courses, each covering not less than a year's work. Here students of a distinctly scientific aptitude may follow in succession the study of physical geography and botany, zoology, physics and chemistry. In the two subjects last named work may be taken for two years. All pupils must take at least one year of science; and many, though not pursuing all the courses, may yet continue their science study for more than one year.

In history four courses are provided. In the first year the subject is Ancient History, with especial reference to the Greeks and Romans. In the second year the student passes into Mediæval History, with especial reference to the emergence of modern European States. In the third year will come a close study of the History of England. In the fourth year there will be a five-period course of American history and civics. Every pupil must take at least one year in history.

The student who intends to pursue a commercial career will have open to him a special group of studies. These studies will furnish a general training in English, mathematics, history, science, and German, as well as instruction in book-keeping, commercial arithmetic, commercial geo-

graphy, history of commerce, commercial law, political economy, stenography and typewriting.

Drawing and physical culture form a part of the regular work of each year.

Typical Curriculums Made from the Studies Offered.

Below some typical curriculums are worked out, showing how, from the general program of studies, the pupil is guided to attain his particular end in attending the College. Nos. 1, 2 and 3 are good curriculums for pupils going directly from the college into the business of life. With some modifications any one of these curriculums will fit pupils for the Teachers' Training School. Latin may be added if desired. Nos. 4. and 5 are arranged for the pupils preparing for college, taking Greek or the German and French equivalent of Greek. No. 6 is the specifically commercial curriculum.

Rules for the Administration of the Program of Studies.

A complete curriculum shall consist of 150 credits, five credits to be given for a study pursued successfully five times a week for one-half year, and proportional credits for studies pursued less than five times a week. Of this total of 150 credits at least 134 credits must be made in the first five groups of studies on the program. In estimating credits in the unprepared studies, periods of work are counted at one-half value of those devoted to prepared subjects.

Pupils must carry through every half-year work representing not less than eighteen nor more than twenty-three credits. Exception from this rule will be granted only upon considerations of health and the scholarship record of the pupil during the preceding half-year.

Whenever a pupil or class of pupils shall have completed a course in any subject in less time than is regularly assigned to that subject, such pupil or pupils shall receive the full benefit of the time saved; but whenever pupils take more than the customary time to complete a course of study, such additional time will not be credited toward the completion of the curriculum.

No credit will be given for a study which would generally occupy a year until such study is completed.

Pupils will not be allowed to take a study which is a natural sequence of one that has not been successfully completed.

No foreign language will be credited for less than two years.

Pupils desiring to enter the Teachers' Training School shall, in making their credits, always include the following courses: Three courses in English, two courses in a foreign language, two courses of history (one of which shall be American history and civics), two courses in mathematics, two courses in science, and two courses in drawing and physical culture. A course in any subject is a full year's work pursued the full number of periods per week indicated on the program of studies.

Opportunities may be given for preparation for any college or technical school, if a desire for such preparation is made known at the beginning of the high school course.

Three years of English, two years of a foreign language, two years of mathematics, one year of history, one year of science, and two years of drawing shall be *constants* in every curriculum.

The other subjects taken during each half-year to fill up the quota of studies shall have the approval of the principal.

In recording and reckoning the application and scholarship of pupils, the daily marking system will not in general be used, though it may be permitted by the principal as a special convenience in particular subjects.

The results of frequent examinations occupying the time of a single period, taken with the judgment of the teacher upon the pupil's daily work, shall, on the approval of the principal, constitute the basis upon which proficiency is reckoned and promotion is made.

When a curriculum is completed the pupil will be entitled to a diploma, accompanied by a certificate, which shall show the studies successfully pursued and the length of time devoted to each. Credits earned in excess of the requirement will be recorded on the certificate.

Pupils who shall have successfully pursued a full quota of studies for one or more years may, at the close of any year, if leaving the school, receive a certificate stating the studies taken and the time devoted to each.

Whenever the number of pupils taking a subject in any class (except the graduating class) shall fall below fifteen, such subject shall be discontinued.

The maximum number of pupils in any class shall not exceed forty, except under extraordinary circumstances.

The minimum number for forming a class in any subject shall be for the first year, thirty; for the second year, twenty-five; for the third year, twenty, and for the fourth year, fifteen. Pupils of any year may, if the schedule of recitations permits, pursue subjects assigned for a lower class, but not those of a higher one.

Parents or guardians will be informed, as occasion may arise, when pupils, by reason of a lack of health, capacity, application, or from other cause, are not doing satisfactory work; and in such cases a request may be made for a conference, for the purpose of lessening the number of the pupil's studies, of changing them, or in other ways arranging the work to make the school profitable to the pupil.

DETAILS OF THE VARIOUS COURSES.

English.

The course includes the study, both through literature and by practice, of the rhetorical forms of discourse, emphasizing, in the first year, Narration; in the second Exposition; in the third, Description and Argument. In the fourth year Argument and Persuasion are taught intensively together with a review of the topics previously studied.

During the entire course three hours each week are given to literature and composition concurrently, and one hour each week to composition exclusively.

The work is arranged as follows:

FIRST YEAR.

Literary Forms: The Story in prose and verse. Literary Texts: Irving's Sketch Book; Whittier's Snow Bound, etc.; Hawthorne's Tales of the White Hills; Scott's Ivanhoe; Poe's Poems and Tales; Lowell's Vision of Sir Launfal. Longfellow's Evangeline. History of American Literature.

Composition: Narration and Description, with the emphasis on the former.

SECOND YEAR.

Literary Forms: The Novel and the Ballad. Literary Texts: Goldsmith's Deserted Village, and Vicar of Wakefield; Scott's Lady of the Lake; Coleridge's Ancient Mariner; George Eliot's Silas Marner; Hawthorne's House of Seven Gables.

Composition: Narration, Description, and Exposition with the emphasis on Exposition. Commercial Correspondence for special classes.

THIRD YEAR.

Literary Forms: The Lyric and the Essay. Literary Texts: Palgrave's Golden Treasury of Lyrics; Milton's Minor Poems; Macaulay's Essays on Johnson and Addison; Carlyle's Heroes and Hero Worship; Addison's Sir Roger De Coverly Papers; Lamb's Elia; Shakespeare's Julius Cæsar, Poetry of the People.

Composition devoted mainly to Description and Argument.

FOURTH YEAR.

Literary Forms: The Epic and the Drama. Literary Texts: Tennyson's Idylls of the King; Arnold's Sohrab and Rustum; Shakespeare's Merchant of Venice and Macbeth; Thackeray's Henry Esmond; Howell's The Rise of Silas Lapham; Washington's Farewell Address; Webster's Bunker Hill Oration; Burke's Speech on Conciliation.

A sketch of the whole history of English literature is attempted, dwelling especially upon the Elizabethan Age.

Composition: A review of the four kinds of discourse.

German.

This subject is begun in the second year, save in the Commercial classes, where it is taken up in the first year.

FIRST YEAR.

The aim of the first year's work is to afford a thorough grounding in the essentials of German Grammar. Reading of easy prose and poetry, with constant drill in composition and conversation. Text-books: Vos' Essentials of German Grammar; Wesselhoeft's German Exercises; Immensee; Neffe als Onkel; L'Arrabbiata; Der Zerbrochene Krug;

Fritz auf Ferien; German Lyrics and Ballads, (Hatfield).

SECOND YEAR.

A complete review of elementary Grammar, based on Part I of Thomas' German Grammar. Frequent exercises in composition, memorizing of familiar poems, conversation. Text-books: Wilhelm Tell; Der Bibliothekar; Das Edle Blut; Das Mädchen von Treppi; Four German Comedies (Manly and Allen); Germelshausen; German Lyrics and Ballads (Hatfield).

THIRD YEAR.

Thomas's Grammar, Part II (Syntax). Original Essays and reports; introduction into historical German Grammar; outlines of German literature, with Keller's Bilder aus der Deutschen Litteratur as text-book. Egmont; Minna von Barnhelm; Die Journalisten; Die Harzreise. Sight reading.

Throughout the three years, German is, as far as practicable, the class-room language.

French.

This subject is begun in the second year of the school.

FIRST YEAR.

Study of the essential features of French Grammar in conjunction with reading of easy French prose; themes and oral exercises; careful practice in pronunciation; reading at sight.

SECOND YEAR.

Reading of standard French authors of the nineteenth century; a course in French syntax; composition; oral exercises and practice in pronunciation; written reports in

French of books read. This course is intended to fit students for reading French poetry and prose with ease.

THIRD YEAR.

Survey of French Grammar; exercises in writing and speaking French; a critical study of representative authors of the nineteenth century and of the masterpieces of the great classic writers; reading of a few selected passages from old French; written reports in French of books read; study of French literature, particularly of the period that each author represents. This course is intended to impart, in concise form, a knowledge of the French language and literature from their origin to the present day.

Latin.

FIRST YEAR.

Collar and Daniell's First Year Latin.

SECOND YEAR.

Allen & Greenough's Cæsar, four books; Allen & Greenough's Grammar; a weekly lesson in Latin prose.

THIRD YEAR.

Kelsey's Cicero, six orations, including Manilian Law; Bain's Ovid; selections; Allen & Greenough's Grammar; a weekly lesson in Latin prose.

FOURTH YEAR.

Knapp's Vergil, six books of the Aeneid; Bain's Ovid; Gildersleeve's Latin Grammar; a weekly lesson in Latin prose from Allen's Latin composition.

Greek.

This subject is begun in the second year of the school.

FIRST YEAR.

White's First Greek Book; perhaps a few pages of the Anabasis.

SECOND YEAR.

Harper's Xenophon's Anabasis, books I-IV; Greek prose composition from White's First Lessons; Goodwin's Grammar.

THIRD YEAR.

Keep's Herodotus, Seymour's Homer's Iliad, books I-IV. Greek prose composition from Jones' text; Goodwin's Grammar.

Spanish.

This language is offered in the third and fourth years, four hours a week.

In the first year of the course, grammar, pronunciation, elements of syntax, reading of easy standard prose, and exercises, both oral and written, constitute the work.

In the second year the student is carried further afield in the studies begun in the first. To these are added conversation and reports, written in Spanish of books read.

Mathematics.

FIRST YEAR.

First and Second terms. Wentworth's Elementary Algebra. The work embraces definitions and notation, simple integral equations with one unknown quantity, positive and

negative numbers, addition, subtraction, multiplication, division, special rules, factors, common factors and multiples, fractions, fractional equations, simultaneous simple equations, inequalities, involution and evolution, theory of exponents, radical expressions, imaginary numbers, quadratic equations, simultaneous quadratic equations, problems producing quadratic equations.

SECOND YEAR.

First Term.—Wentworth's Plane Geometry. Books I to V, including exercises in construction and loci, original theorems for demonstration, and problems involving the principles in the text. Frequent written work is required.

Careful attention is given to direct the student in his efforts to discover a proof and to train him in the best methods of attacking and solving geometrical exercises.

The limitations of elementary geometry are pointed out that the student may realize the necessity for the higher branches of mathematics.

Second Term.—Wentworth's Solid Geometry. Books VI and VII. In the geometry of space the student is required to draw on the board accurate diagrams of the half-tone engravings in the book and a spherical blackboard is used in connection with the geometry of the sphere. Original exercises are continued.

Throughout the study of geometry great emphasis is placed on all propositions having a practical value that the student may acquire facts and principles likely to be of use in subsequent life. To this end the demonstrations are enforced by an abundance of numerical exercises.

THIRD YEAR.

(a) Fisher & Schwatt's Quadratics and Beyond. Quadratic equations are reviewed and work is continued in the progressions, variables and limits, series, logarithms, exponen-

tial equations, logarithmic equations, permutations and combinations, the binomial theorem, undetermined coefficients, partial fractions.

(b) Wentworth's Plane Trigonometry. The measurement of angles; the functions of acute angles; geometrical representation of functions; solution of the right triangle; Logarithmic and trigonometric tables; goniometry; derivation of formulas; the inverse notation; problems involving the right triangle; graphic representation of the trigonometric functions; derivation of formulas; solution of the oblique triangle; the area of a triangle; transformations; trigonometric equations; miscellaneous exercises and problems.

FOURTH YEAR.

Ashton's Analytic Geometry. The topics treated are the point, the locus of an equation, the equation of a locus, the straight line, transformation of co-ordinates, the circle, the parabola, the ellipse, the hyperbola, tangents, diameters, poles and polars. The plotting of curves and problems in loci receive special attention.

Natural and Physical Science.

FIRST YEAR.

(a) Davis' Physical Geography. Special attention given to the interpretation of the region about Baltimore as furnishing typical areas. Individual observation in the field is encouraged; and in this connection free use is made of the topographical maps of the United States Geographical Survey. Several excursions are made to nearby points. The daily weather map is studied; observations of temperature, wind direction and precipitation are made; and monthly summaries are prepared and sent in accordance with the instructions furnished by the Weather Bureau. Abundant class-

room illustrations are provided in the form of charts, diagrams and lantern slides.

(b) Bergen's Foundations of Botany. Plant structure, function of parts, plant relations and classification are taken up. Special attention is given to the laboratory work, and this is designed primarily with the view toward training the pupil in observing. A part of the year is devoted to the study of the lower forms of plant life including bacteria. Neat work is insisted upon. Abundant class room illustration is provided.

SECOND YEAR.

Needham's Lessons in Zoology and Jordan's Animal Life. Animal structure and function are studied: especial attention is paid to the position of an animal in the animal kingdom. A representative form of each of the great groups is taken up. Some stress is laid upon the economic use of animals. The work of this course is conducted chiefly in the laboratory: papers upon selected topics are prepared from time to time.

THIRD YEAR.

(a) Physics.—Hoadley's text.

(b) Chemistry.—Remsen's Briefer Course.

Students may pursue one or both of the courses, (a), and (b), as they elect. The course in physics is arranged largely in accordance with the recommendations of the Committee of Ten, and is intended to meet the ordinary college entrance requirements. There is, throughout the year, a weekly lecture illustrated by historical and typical experiments in which a general view of the whole subject is presented. Quizzes or recitations on the subject matter of the lecture occupy one and sometimes two periods. The remaining time is given to laboratory practice. All laboratory work is quantitative. Carefully kept note books are insisted on.

The course in chemistry includes lectures, daily recitations, laboratory work and frequent examinations. Experiments are made before the classes and use is made of the stereopticon, of collections of minerals and of chemical preparations and of such aids in teaching as may be useful. Every facility is offered the pupil to perform experiments, especial attention being directed to quantitative measurements; constant quizzing is maintained in the laboratory, and pupils are encouraged to do as much laboratory work as is possible, the laboratory being open daily from nine in the morning until four in the afternoon for this purpose.

FOURTH YEAR.

(a) Chemistry, first semester, Introduction to qualitative analysis. Second semester, Organic Chemistry.

(b) Physics.—Millikan & Gale's Text and Ames & Bliss' Manual.

The course in elementary qualitative analysis is intended as an introduction to the simpler processes of analytical chemistry and is supplemented by a thorough review of the metallic chemistry studied in the previous year with collateral reading thereon. This course includes lectures, recitations, laboratory practice and frequent examinations.

The course in organic chemistry comprises a brief introduction to the paraffine series and is accompanied by considerable laboratory work.

This year's course in physics is intended to meet the "advanced requirements" of colleges, and is open only to those students who have completed the course of the third year. Here a fuller presentation of the subject is made; and the laboratory exercises require greater skill and precision. At least two of the four periods are spent in the laboratory.

History, Civics and Economics.

The courses in History extend through four years, beginning with Ancient History in the first year and ending with American History and Civics in the fourth year. At least one year of History is required for graduation. Economics is given as a separate course two hours weekly throughout the fourth year, the time being devoted mainly to the discussion of recent economic and industrial problems.

The object of the work in History is to give the students a comprehensive view of the development of civilization, to train them in correct civic and political thinking, and to furnish them with an historical basis for reading and enjoying the literature of the world. Topics of an interesting character are assigned to different members of the classes for essays or reports which are discussed in the classrooms. In this way the students are familiarized with the use of the library and much collateral reading done.

FIRST YEAR.

Ancient History to 800 A. D.
Myers, Eastern Nations and Greece.
Morey, Outlines of Roman History.

SECOND YEAR.

European History—Medieval and Modern.
Robinson, History of Western Europe.

THIRD YEAR.

English History. Cheyney, A Short History of England.

FOURTH YEAR.

(a) American History and Civics. Hart, Essentials in American History. Forman, Advanced Civics.

(b) Economics. Bullock. Elements of Economics.

Commerce.

The Commercial Course is begun in the first year of the school.

FIRST AND SECOND YEAR.

Single and double entry book-keeping; business forms.

Commercial Arithmetic:—Weights and measures; Metric systems; Commercial interest and discount; partial payments; buying and selling exchanges; stocks and bonds; equating of accounts; adjusting of partnership; joint-stock company and corporation accounts.

Penmanship:—A plain business hand.

Commercial Geography:—Soil, climate and social conditions in their influence on man in the production of the raw and manufactured materials of commerce and their distribution. Illustrative material. In the second there are three periods given to phonography and two to typewriting.

THIRD YEAR.

Business Practice:—Banking. Training the pupil to fill positions in a bank from runner to cashier.

Office Practice. Keeping books for firms, stock companies, buying and selling goods, organization of an office, filing letters, papers, etc.

History of Commerce:—The origin of Commerce, its purposes and its development. The rise and fall of commercial centers. Tariff systems and their effect on commercial relations. The physical and technical factors which have contributed to the wonderful expansion of American commerce.

Phonography is taught twice a week in this year.

First Term:—Alphabet, word and sentence building; use of circles, loops and semicircles; tick and dot H and double consonants (initial hooks).

Second Term:—Use of final hooks; halving principle; doubling principle; prefixes and affixes; drill on word and phrase signs; elementary practice work. Text: Pitman

Phonography by Parke Schoch. The so-called reporting style is taught from the start; and care is taken that the student shall have to unlearn nothing that has already been learned. Accuracy is insisted upon to such an extent as to enable the student to read each outline perfectly. Practical work in writing and reading is commenced at the beginning of the year.

FOURTH YEAR.

Commercial Law:—Elementary principles of such topics as contracts, bills and notes, agency, partnership, corporations, insurance, real property, surety and guarantyship, fixtures, bailments and common carriers.

Phonography is continued as follows:

PRACTICE.—The practice during this year is on graded exercises, starting with simple business correspondence, and leading up to special and technical lines. Accuracy is the great aim that is constantly kept before the pupil; and the work is so graded that speed is acquired almost unconsciously. Considerable attention is given to the accurate reading back of notes.

Typewriting is taught after the following scheme:

First Term.—Fingering exercises, copying from manuscript, both plain and corrected; mechanism and care of machine; insertion of omissions and corrections.

Second Term.—Copying from shorthand notes; writing legal forms; manifolding; billing; tabulating; mimeographing and other duplicating.

The text-book used for the first term's work is Fuller's "Touch Writer." The system is essentially the touch system.

In connection with this work the student is taught the use of the letter press and the letter file, also card indexing—the most popular methods of handling correspondence being illustrated.

NOTE.—Students will supplement the purely business topics indicated in the commercial course by subjects from other groups.

Drawing.

FIRST YEAR.

Free-hand Perspective:—

Drawing in outline from geometric solids; ornaments; still life.

Simple value and color work from models.

SECOND YEAR.

(First Semester)

Free-hand Perspective:—

Drawings from groups of geometric solids; from still life groups; from artistic and historic ornaments.

Value and color work.

(Second Semester)

Instrumental Drawing:—

Simple orthographic projections; elementary perspective; dimensioning; lettering.

THIRD YEAR.

(a) (Freehand) Advanced freehand drawing from models and casts; color work from models; designing.

(b) (Mechanical) Sections and intersections; development of surfaces. conic sections; sketches and drawings from simple details of machines; dimensioning; lettering; tracing; blue printing.

(c) (Architectural) Architectural intersections and developments; simple details; dimensioning; lettering; tracing; blue printing.

(d) Instrumental perspective; elementary projections of shades and shadows.

FOURTH YEAR.

(a) (Freehand) More advanced freehand drawing; value and color work; designing.

(b) (Mechanical) Sections and intersections; screw threads; belt and tooth gearing; elements of mechanical motions; sketching; dimensioning; lettering; tracing; blue printing.

(c) Architectural) Architectural details; plans; elevations; dimensioning; lettering; tracing; blue printing.

(d) Descriptive Geometry.

NOTE:—Students of the third and fourth years have the privilege of selecting that one of the courses, (a), (b), (c) or (d) they prefer.

Physical Training.

FIRST YEAR.

Light apparatus; stretching and flexing movements; correcting defective position of head and shoulders; developing erect carriage and grace of body.

SECOND YEAR.

Light apparatus; climbing and jumping; chest and spinal movements; developing chest and legs; cultivating presence of mind.

THIRD YEAR.

Light and heavy apparatus; chest weights; developing the body equally, and correcting all weak parts.

FOURTH YEAR.

Chest weights; climbing ropes and poles; parallel bars; horizontal bars; swinging rings; vaulting bar; vaulting horse; high and broad jumping; general body building.

NOTE.—As soon as a student takes up physical training, he is examined and measured according to the principles of anthropometry; and suitable exercises are prescribed.

TERMS OF ADMISSION.

Boys who have satisfactorily completed the work of the eighth grammar grade are admitted to the College on the recommendation of the group principals and the approval of the Superintendent. Boys who are not pupils of the public schools may be admitted after passing a satisfactory examination in the studies pursued in said eighth grade.

A *special* examination for admission is held at the College every year, shortly after the opening in September, to accommodate candidates who have not attended the public schools of Baltimore.

For the information of persons not familiar with the work of the eighth public school grade, it is stated that the examination above indicated embraces spelling, reading, writing, grammar, composition, arithmetic, the beginnings of algebra, concrete geometry, geography, and history of the United States.

NON-RESIDENT STUDENTS.

Students whose parents or guardians are not *bona fide* residents of Baltimore must pay \$62.00 per annum for tuition and use of books. This sum is payable quarterly, *invariably in advance*, at the office of the Comptroller of Baltimore, in the City Hall.

Non-resident applicants for admission must pass the required examination, and then present a certificate of vaccination and a receipt showing the payment of the tuition fee for the current quarter. If the parent or guardian of any non-resident is a taxpayer in the city, a receipted tax bill for the year in question should be presented at the office of the Board of School Commissioners, that the proper deduction may be made from the tuition bill.

PRIVILEGE OF GRADUATES.

1. MATRICULATION AT JOHNS HOPKINS UNIVERSITY.—Graduates, on the recommendation of the College Faculty, are permitted to matriculate without examination at the Johns Hopkins University.
 2. ACCEPTANCE OF CERTIFICATES.—Certificates of work done at the City College are accepted, in lieu of examinations, at Cornell University, George Washington University and other institutions of learning.
-

SCHOLARSHIPS.

1. In the spring of 1900, the Board of Trustees of Lehigh University authorized the annual award of a scholarship, in the classical course of its collegiate department, to that student of Baltimore City College who may be recommended by the Faculty as most worthy of the honor.
2. In June, 1901, the Board of Trustees of the George Washington University at Washington, D. C., authorized the annual award of a scholarship in the George Washington College to that student of the Baltimore City College who may be recommended by the Faculty as the most deserving applicant.
3. In February, 1906, Washington and Lee University offered a scholarship to this school.
4. In January, 1906, the Baltimore Business College offered two annual scholarships to members of the graduating class of the City College.

The conditions prescribed for the award and tenure of the above scholarships may be learned by applying to the Principal of the City College.

PRIZES.

- I. **PEABODY PRIZES.**—Mr. George Peabody, in his letter to the “Trustees for the establishment of an Institute in the City of Baltimore,” expressed his desire that the said Trustees, “in order to encourage and reward merit” shall distribute five hundred dollars every year in money prizes of sums not less than fifty dollars nor more than one hundred dollars for each prize, to those graduates of “the public male high school now existing or which may hereafter be established,” who shall “be judged most worthy, from their fidelity to their studies, their attainments, their moral deportment, their personal habits of cleanliness and propriety of manners.”

By arrangement between the Trustees of the Peabody Institute and the Board of Commissioners of Public Schools, the annuity donated by Mr. Peabody is divided into three prizes of one hundred dollars each and four of fifty dollars each. These sums are distributed yearly, in the order of merit, to the seven young men standing highest among the graduates, who have complied with the following conditions of competition, viz: All the work offered for graduation shall have been done in the public schools of Baltimore and completed in not more than four years; and at least thirty-six of a candidate's credits shall have been obtained by the pursuit of courses in subjects set for the fourth year.

- II. **THE FREDERICK RAINE PRIZE**—Colonel Frederick Raine, whose death occurred early in 1903, left by will to the Mayor and City Council of Baltimore a bequest of \$200, with the condition that this sum should be invested, and the income from the investment be annually applied to the purchase of a gold medal, to be awarded to that graduate of Baltimore City College whose record is highest in the work of the German department.

- III. **PRIZES OPEN TO MEMBERS OF THE COLLEGE SOCIETIES.**—These prizes are described on Page 59.

THE LIBRARY OF BALTIMORE CITY COLLEGE.

Students of the College have access to the books in this library, under the supervision of the Librarian, Miss Alice W. Reins. On its shelves are more than eight thousand volumes of reference and high-class literature.

During study periods students may obtain permission to use the library for the purpose of reading and investigating topics related to the regular work of the several departments. The members of the graduating class may borrow books for a definite period. Other students, in special cases, may also be accorded the borrowing privilege.

The library is open to all officers and teachers of the public schools. Its hours are from 9 A. M. to 4 P. M. On Saturdays it closes at 1 P. M.

COLLEGE ORGANIZATIONS.

ALUMNI ASSOCIATION.

The graduates of the Baltimore City College, recognizing the advantages to be secured to themselves and the College by periodical reunions of the Alumni, organized themselves into a permanent association May 15, 1885.

"The aim of the Association is to strengthen the bond of union of the graduates and former students, to perpetuate the affection they cherish for the institution, to foster the prosperity of the College by giving their support and sympathy to its faculty and officers."

The government and administration of the Association are entrusted to an Executive Committee consisting of two members from each class represented in the Association.

The following Alumni have held the office of President since its formation:

1885.....	Thomas S. Baer.....	Class of '58
1886.....	Theodore K. Miller.....	Class of '63
1887.....	Dr. Edward H. Spieker.....	Class of '77
1888.....	Theodore F. Wilcox.....	Class of '71
1889.....	J. Frank Supplee.....	Class of '67
1890.....	William H. Shryock.....	Class of '49
1891.....	John J. Dobler.....	Class of '68
1892.....	Daniel Miller.....	Class of '67
1893.....	John C. Rose.....	Class of '77
1894.....	John B. Van Meter D.D.....	Class of '59
1895.....	Alvin P. Kennedy.....	Class of '66
1896.....	Edward C. Cockey.....	Class of '51
1897.....	Weslev M. Oler.....	Class of '74
1898.....	C. Herbert Richardson, D.D.....	Class of '59
1899.....	George B. Skinner.....	Class of '64
1900.....	Joseph M. Watkins.....	Class of '74
1901.....	Samuel D. Helfrich.....	Class of '62
1902.....	Walter Snyder.....	Class of '56

1903.....	John H. Sirich.....	Class of '65
1904.....	Samson M. Brownold.....	Class of '83
1905.....	Thomas Ireland Elliott.....	Class of '73
1906.....	Douglas H. Rose.....	Class of '80
1907.....	Thomas Foley Hisky.....	Class of '83
1908.....	William C. Jenness.....	Class of '69
1909.....	John T. King, M.D.....	Class of '63

The present officers are :

<i>President</i>	John T. Stone.....	Class of '75
<i>First Vice President</i>	Louis J. Burger.....	Class of '90
<i>Second Vice-President</i> , T. Reese Cornelius.....		Class of '98
<i>Secretary</i>	William Benson.....	Class of '71
<i>Treasurer</i>	Calvert F. Stein.....	Class of '98
<i>Chairman of Executive Committee</i>	Thomas G. Potts.....	Class of '75

All graduates and former students are entitled to membership upon application to the Executive Committee.

The admirable spirit shown by this association, and the many practical proofs of the affection and devotion of its members in things that concern the College, are matters of profound satisfaction to the Faculty and the School Board.

THE BANCROFT LITERARY ASSOCIATION.

"The object of this Association is the improvement of all connected therewith, in debate, in oratory and in general literature."

OFFICERS.

<i>President</i>	Lawrence Getz.
<i>Vice-President</i>	Harold Sigmund.
<i>Secretary</i>	Earl L. Uhler.
<i>Corresponding Secretary</i>	Alvin S. Silberman.
<i>Treasurer</i>	Albert T. Hammond.
<i>Sergeant-at-Arms</i>	George Gruner.
<i>Board of Curators</i>	{ Harry Schisler.
	{ Millard Eiseman.

THE CARROLLTON-WIGHT SOCIETY

"This Society has for its object the realization on the part of its members of those benefits to be derived from exercise in debate and elocution, the promotion of said members in general literary culture, and their familiarization with parliamentary usages."

<i>President</i>	J. Louis Rome.
<i>Vice-President</i>	Moses Feldman.
<i>Secretary</i>	Harry Stein.
<i>Assistant Secretary</i>	Arthur L. Evans.
<i>Treasurer</i>	Henry M. Whalen.
<i>Sergeant-at-Arms</i>	Joseph Collinson.

The Bancroft and the Carrollton-Wight Societies annually contest in public for two gold medals donated by Prof. Wilbur F. Smith, one for excellence in declamation and the other for skill in debate.

These two societies have each a Reunion Association, composed of former and present members.

Prof. G. Emory Morgan offers to the two literary societies a gold medal for the best essay upon some assigned topic.

THE AGASSIZ ASSOCIATION.

CHAPTER 233, BALTIMORE, MD. (A.)

"The aim of the Agassiz Association is to collect, preserve and study natural objects."

OFFICERS.

<i>President</i>	William B. Spooner.
<i>Vice-President</i>	Malcolm H. Lauchheimer.
<i>Secretary</i>	Nathan B. Herman.
<i>Treasurer</i>	August Lodato.
<i>Sergeant-at-Arms</i>	Herbert Burgunder.

<i>Executive Committee...</i>	Frank A. Angerman.
	Nathan B. Herman.
	Harry E. Cook.
	Malcolm H. Lauchheimer.
	August Lodato.

The Agassiz Association has suitable cases for the preservation of specimens.

The two literary associations and the society of young naturalists are extremely valuable educational adjuncts to the regular work of the school, and all students are strongly advised to seek membership in one or more of these bodies."

GENERAL ATHLETIC ASSOCIATION.

OFFICERS.

<i>President</i>	Gerald C. Connolly.
<i>First Vice-President</i>	John M. LeCato.
<i>Second Vice-President</i>	Loutrell Timanus.
<i>Secretary</i>	James Patterson.
<i>Treasurer</i>	Walter D. Sutton.
<i>Sergeant-at-Arms</i>	Henry D. Jay.
<i>Curator</i>	Roy D. Pippen.

MANAGERS OF TEAMS.

<i>Football</i>	Joseph F. Collinson.
<i>Baseball</i>	Frank L. Williams.
<i>Basket-ball</i>	Charles H. Peters.
<i>Lacrosse</i>	Donald C. Magie.
<i>Field and Track</i>	John M. LeCato.
<i>Polo</i>	Walter D. Sutton.
<i>Crew</i>	George E. Dorsey.

The Athletic Association affords excellent opportunity for physical culture and healthful recreation.

Its sports and games are strongly commended to the students. Under the supervision of Instructor Lorett, this Association has special opportunity for practice in the gymnasium several times a week, as well as for outdoor work in suitable weather.

CLASS OF 1910.

OFFICERS.

<i>Honorary President</i>	Dr. Ernest J. Becker.
<i>President</i>	Walter D. Sutton.
<i>Vice-President</i>	Thomas S. George.
<i>Secretary</i>	Stuart D. White.
<i>Treasurer</i>	William M. Meissel.
<i>Sergeant-at-Arms</i>	Gerald C. Connolly.
<i>Artist</i>	Dorsey P. Tyson.

CHESSE CLUB.

(ORGANIZED SEPTEMBER 30, 1907.)

"This Club has for its object the improvement of all connected therewith in the game of chess."

OFFICERS.

<i>President</i>	Frank A. Angerman.
<i>Vice-President</i>	J. Louis Rome.
<i>Secretary</i>	Harry E. Cook.
<i>Assistant Secretary</i>	Henry M. Whalen.
<i>Treasurer</i>	John S. Fenby.
<i>Curator</i>	Saul Silberman.
<i>Sergeant-at-Arms</i>	James J. Waygood.

INSTRUMENTAL CLUB.

OFFICERS.

<i>President and Director</i>	Walter F. Geissel.
<i>Vice-President</i>	Thomas S. George.
<i>Recording Secretary</i>	Sydney Seidenman.
<i>Treasurer</i>	Earl P. Gallaher.
<i>Sergeant-at-Arms</i>	R. Mortimer Browning.

GLEE CLUB.

OFFICERS.
